Authorization for Cremation & Disposition

I do hereby give this explicit authorization to: **Evergreen Cemetery/Crematory** (the crematory) to provide the following services, to which I agree to pay the usual and customary fees.

1. Cremation:

Cremated the body of the decedent named above in accordance with the subject to the crematory's rules and regulations and the law and regulation of the State of California. I acknowledge the following descriptive statement of the cremation process as required by the Health & Safety code Section 7054.7 (c) (b).

"The human body burns with the casket, container, or other material in the cremation chamber. Some bone fragments are not combustible at the incineration temperature and, as a result, remain in the cremation chamber. During the cremation, the contents of the chamber may be moved to facilitate incineration. The chamber is composed of ceramic or other material which disintegrates slightly during each cremation and the product of that disintegration is commingled with the cremated remains. Nearly all of the content of the cremation chamber, consisting of the cremated remains, disintegrated chamber material, and small amounts of residue from previous cremations, are removed together and crushed, pulverized, or ground to facilitate inurnment or scattering. Some residue remains in the crack and uneven places in the chamber. Periodically, the accumulation of this residue is removed and interred in a dedicated cemetery, or scattered at sea."

1a. I understand that the crematory will not accept the remains of the Decedent for cremation unless they are in a leak resistant, rigid combustible container. I authorize the crematory to remove and dispose of handles, ornaments and all other non combustible materials of the cremation container or casket.

1b. I further acknowledge the following: "A person having the right to control disposition of cremated remains may remove the remains in a durable container from the place of cremation or interment, pursuant to Section 7054.6 of the Health & Safety Code." If the cremated remains container cannot accommodate all of the cremated remains of the deceased, the crematory shall provide a larger container at no additional cost, or place the excess in a second container that cannot easily come apart from the first, pursuant to Section 8345 of the Health & Safety code.

2. Implants, Mechanical & Radioactive Devices:

Mechanical or radioactive devices, such as pace makers and insulin pumps may be a hazard if placed in the cremation chamber. The crematory will therefore not knowingly cremate any remains which contain such a device.

I certify that the remains of the Decedent do not contain a mechanical device or that I have arranged for their removal prior to delivery to the crematory. _____ *INITIALS*

If any such items are recovered from the chamber I authorize their disposal.
